### **DETAILED ACTION**

Claims 6, 8, 9 and 11 are currently pending.

### **ELECTION OF SPECIES**

This application contains claims (e.g. claim 6) to a markush group of insulin(s) analogues that encompass diverse peptide compounds comprised of different amino acid content and/or; different amino acid length which result in peptides which are structurally different and possess different conformation and would be expected to possess different physicochemical properties and/or be capable of separate manufacture (e.g. synthetic v. Recombinant) and/or use and result in different and separately burdensome searches including different classification searches and/or different bibliographic searches and different compound searches involving different programs.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species e.g. a single insulin peptide for prosecution on the merits.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1639

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
